Student Name : Rakhi Raj

Roll No: 46

Project Title : Diary Management System

Abstract

Diary Management System is a web application that will be developed using latest industrial standard technologies like HTML5, CSS3 and PHP. The site will be responsive in nature and for that will be using latest BOOTSTRAP framework. The proposed system helps in easy to find the details of farmers , employees , deliveries from the site. Preferably reduces the time and thereby increases the efficiency of the system. This web application helps keeping record of delivery and payment to be done , hereby making it easy to store , view and edit whenever needed.
